

MEDIA RELEASE

IFPL celebrates three-millionth peripheral to major OEM

Leading Inflight Entertainment & Connectivity (IFEC) provider, IFPL, celebrated a major milestone this month, supplying their three millionth industry part.

The three-millionth part was delivered to a world leading Original Equipment Manufacturer (OEM), just three years after the two-millionth, demonstrating continued sustainable growth.

IFPL Chief Operating Officer, Neil McGregor commented; "It is a testament to the whole IFPL team, that we have reached this new milestone so soon after reaching two million units, and is a testament to the investment we have made in our quality systems, and our manufacturing and product development capability. This combined with the development and introduction of new products, means that we aim to reach our four-millionth unit even sooner."

The innovative three millionth unit is a twin USB-A product. The power outlet contains two reversible USB-A outlets with lightguides for easy location. The bi-directional insertion means that whichever way round the passenger tries to insert their USB connector they will always get it right.

This USB port is part of an extensive range of products which includes our latest USB power and data technology. See these products at the Airline Passenger Experience in Los Angeles this September.

Editor's Notes:

IFPL is an award-winning designer, innovator and manufacturer of passenger interface solutions to the global In-Flight Entertainment and Connectivity industry (IFEC).

IFPL's comprehensive in-house capability, combined with its unique ability to pursue industry-leading innovation with manufacturing excellence, enables clients to work closely in transforming ideas from concept to prototype and delivery as an industrialised, certified and production-ready solution. IFPL can often achieve this within months, rather than the standard years.

Founded 20 years ago by CEO Geoff Underwood, IFPL today enjoys the largest portfolio of proven IFEC products and services in its sector. As a proud and dedicated supplier of the world's leading in-flight entertainment manufacturers and airlines, IFPL continues to inspire and enhance aircraft passenger experience by delivering innovative product design with proven reliability.

IFPL is based on the Isle of Wight, just off the South Coast of England, in modern offices which house an award winning manufacturing facility that boasts extensive product design, R&D and manufacturing capabilities.
