ECA Group unveils a new In-Flight Entertainment Turnkey solution – Switch on your devices!

ECA Group announces today at APEX EXPO 2019 the release of its new onboard connectivity turnkey solution for aircraft, co-developed in partnership with in-flight entertainment (IFE) industry leaders PCom and Global One Media.

To address the growing onboard services and entertainment demand, airlines are looking for safe and efficient solutions to modernize their cabin & brand image.

ECA GROUP, PXC.COM and GLOBAL ONE MEDIA joined their expertise to develop an efficient, cost-effective and user-friendly IFE Solution dedicated to airlines, MROs and aircraft manufacturers.

A cooperation to improve passenger's comfort

This new generation of [In-Flight Entertainment solution](#) which aims at facilitating the broadcasting of pre-loaded and external in-flight entertainment contents on passenger's personal devices. This will be made possible thanks to an easy-to-use web interface to access onboard services and contents.

The combination of ECA GROUP's advanced hardware, with PCom software solution and a content partner, Global One Media, is what makes this new solution to change the way of managing and experiencing a flight.

Gilbert Rosso, CEO of ECA GROUP's Aerospace Division

"ECA Group was looking to collaborate with best experts in software and content management to complete its IFE & connectivity services offer for airlines. Therefore, we chose to partner with PCom and Global One Media to develop a completely new, game changing solution for our clients. Now, together with our partners we are ready to deliver a fully personalized onboard experience".

IFE & onboard services turnkey solution - an attractive solution for airlines to enhance passenger experience

A customizable, cost-effective and powerful solution for onboard services

[IFE & onboard services turnkey solution](#) has been designed as a modular & customizable solution to fit any airlines' needs for providing in-flight entertainment and services.

Lightweight, compact and cost-effective, it provides a protected and secured wireless internet network to passengers and crews on board.

This new turnkey solution is based on proven technology to a full Wi-Fi coverage in the aircraft. It allows passengers to enjoy high speed internet network and watch high resolution streaming. Thanks to its embedded Media Server size, a significant number of contents are available.

With an easy-to-configure interface, this solution will help airlines to provide a wide range of services and content. Airline crews will also benefit from an easy management of their services to passengers through the user-friendly web interface.

Services are very easy to access, making it a good alternative for airlines to gain ancillary revenue while increasing passengers' satisfaction.

Bring a wide range of content onto passengers' personal devices

IFE & onboard services turnkey solution increases passengers comfort by allowing to use their own electronic device to rapidly access various internet-based & entertainment services such as:

- VPN network
- Social Media
- Music
- International movies
- TV shows
- Customized programs
- Games
- Video chats
- Emails
- Safety videos
- Travel mapping
- Online shop

Worldwide sales and support network

ECA Group brings [IFE & onboard services turnkey solution](#) on the market through its local distributors. Customers can benefit from a worldwide support and dedicated customer services team.
